PONTTO

❖ The time clock **Pontto** is Topdata's new solution for companies that are looking forward efficiency to control the assistance of its employees.

Pontto is a modern time clock. Externally its has a pleasant design and internally its compact printing mechanism is controlled by a microprocessor, ensuring security and accuracy in its operations.

Pontto is a versatile equipment, it is more than a time clock that can be used for several different applications with the same efficiency. Besides registering employees entry and exit times, Pontto performs other tasks like control shift times, identifying late arrivals and early exits, Pontto can activate a device to indicate beginning or end of shifts and it automatically adjusts for daylight saving time, all of this guided with LCD messages. And the most important is that all of this is done in a very easy way, to punch all you have to do is insert the card, there is no need to handle a lever or press a button. Pontto can be installed by the user without local technical support.

Register control of employees
